I am interested in learning about potential employment opportunities in database management and administration. I have a background working in the help desk for the University of Louisville College of Businesses IT department. As a Computer Information Systems major at the University of Louisville I found success in my database, data analytics, and data entry courses. As a freshman, I developed a project for the College of Business that analyzed the quality of Journals professors published to my department. My junior year I developed an interest in database administration and learned how to manage databases using Microsoft SQL Server.

Thank you for your time and I look forward to hearing back from you about how my skills might benefit your organization. If you don't currently have any openings, feel free to keep my resume and contact me in the future.

Sincerely,

Bryce Green
